

## **Sani-Cloth Plus Germicidal Disposable Cloth / Professional Disposables International (PDI) RECALL (8/14)**

### **Reason/Information:**

Professional Disposables International issued a recall on the following materiel (See Image on Message under Additional Documentation/Attachment). Reason: Testing results raised a question about efficacy for Mycobacterium bovis BCG (tuberculosis). Pending further review and analysis, PDI is voluntarily removing that claim from the Sani-Cloth Plus.

While testing is still ongoing, initial results raised a question about efficacy for Mycobacterium bovis BCG (tuberculosis). Pending further review and analysis, PDI is voluntarily removing that claim from the Sani-Cloth Plus. The company is working to resolve this issue as soon as possible. The company is optimistic that the Mycobacterium bovis BCG (tuberculosis) claim will be back on the product label in the future.

PDI has taken this step voluntarily due to preliminary test results which indicate the product may not pass testing necessary to support a Mycobacterium bovis BCG (tuberculosis) claim. Sani-Cloth Plus continues to be efficacious for use against the remaining 16 microorganisms referenced on the label (See attached updated technical data bulletin). The removal of the Mycobacterium bovis BCG (tuberculosis) claim only applies to PDI Sani-Cloth Plus.

PDI is currently obtaining new labels and will begin shipping replacement product shortly. In the meantime, PDI offers several other products that have been proven efficacious for Mycobacterium bovis BCG (tuberculosis). These products are:
